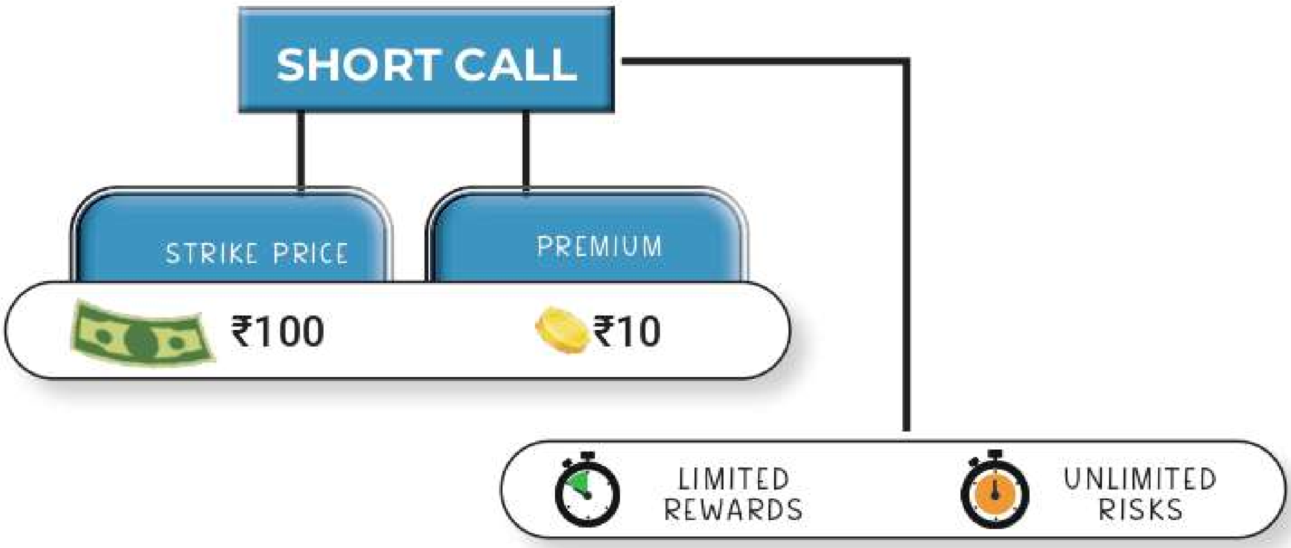
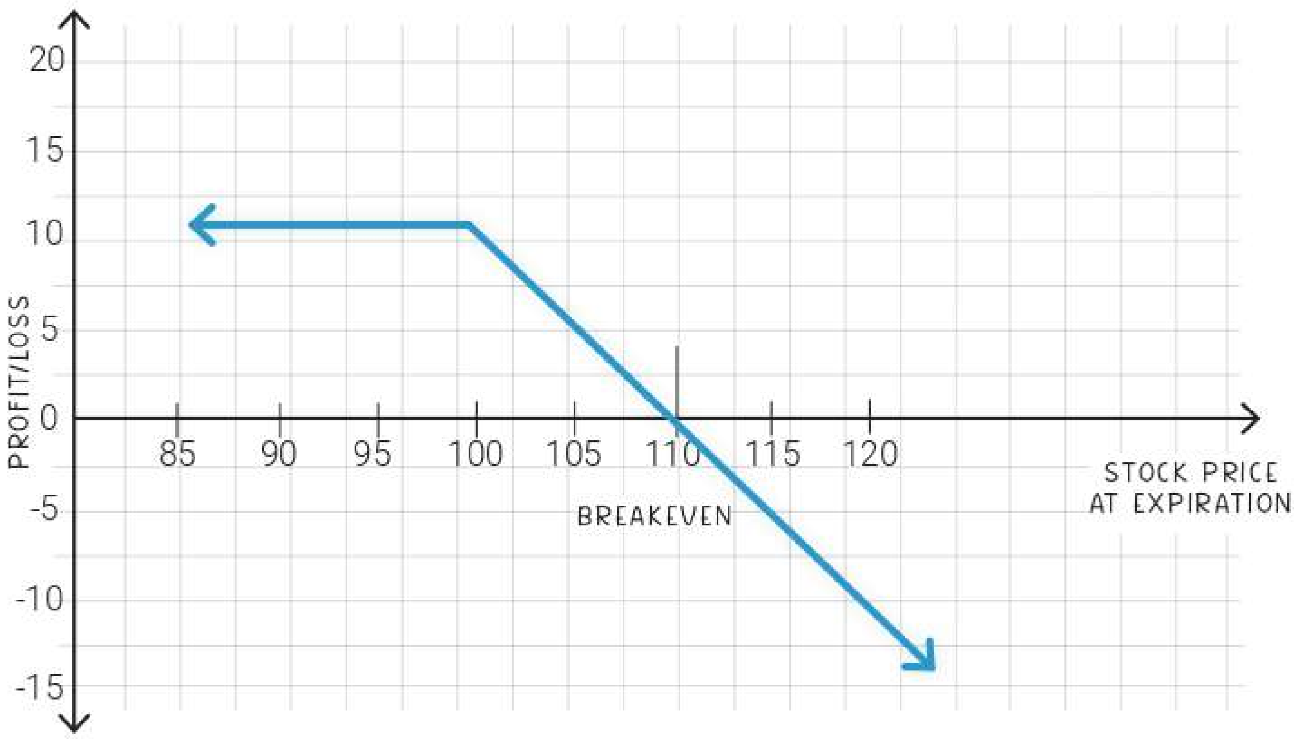
PAY-OFF FOR CALL SELLER

For call options seller, the scenario is opposite or mirror image of the buyer's payoff chart as the seller has limited profits and unlimited losses.
Suppose that Mr. Y sells a call option at a Strike price of ₹100 in exchange of a premium amount of ₹10 for the same.





In the graph above, we have Profit or Loss on the Y-axis and Price of the Stock at the expiration on the X-axis.
