	Net cash (used in)/ generated from Investing Activities [B]		(1,687.89)		102.94

Next, we have to input the values for cash outflow to purchase investments and proceeds from selling investments and outflow for business acquisitions. So, all these investing activities will fall under the category of net cash flow from investing in financing assets.

Payments for business acquisition also depend on factors like what kind of acquisition it was. If it was an operational acquisition, then you need to categorize under cash flow from operating assets. But, on the other hand, if it is purely for financial reasons, you can put value in financing activities. Next, we have to consider Increases/decreases in bank deposits and increase/decrease in other bank balances. This value also has to be added to the section.
