3 Current Assets

The operating side of Current Assets is automatically filled with the data that it receives from Annual Inputs tab. Now we will be filling out the non-operating side.

Let us start with Financial Assets.

OPERATING **SURPLUS**

Companies generally keep more cash than required for operations. As a result, cash can be divided as Operating vs Surplus Cash.

However, to simplicity, we will treat entire cash and cash equivalents as Surplus Cash i.e. Financial Item. If we have specific data from the company about how much is related to operations and how much is surplus, we can break them up in two parts. Else, we will keep it simple and treat entire cash as Surplus.
