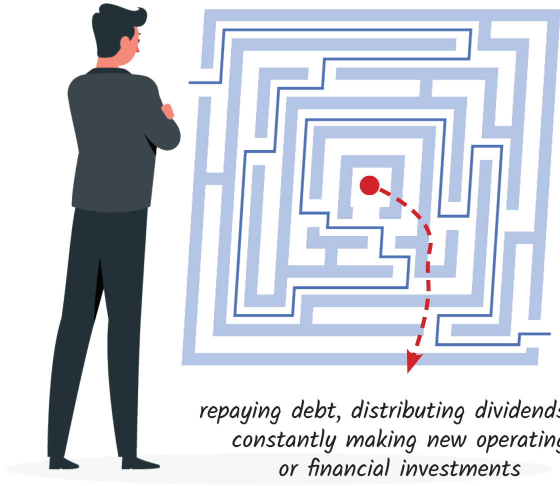
Our job is to analyze the **patterns of the company**, whether it is constantly repaying **debt**, distributing **dividends**, or constantly making **new operating or financial investments**. This number indicates **how the capital generated from the business is being used.**



2 Operating CAPEX/CFO

Here, we will only consider the **operating investments** the company is making. Here we try to understand what part of the overall investments is towards operating assets and what part is towards financial assets.

Cash Flow Ratios						
Sum of Non-cash and non-operating/CGFO	0.07	0.05	0.03	0.07	0.09	0.12
Total Operating Working Capital Changes	-9	-177	-173	-212	5	-145
Total Financing Working Capital Changes	7	37	-4	33	51	172
EBITDA/ CGFO	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
Current Tax Expense/ Taxes Paid	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
Sum of Last 7 years CFO/Sum of last 7 years PAT	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
CFI Ratios						
CFI/CFO	-0.54	-1.11	0.05	-0.61	0.08	-1.21
Operating Capex/CFO	-0.18	-0.15	-0.22	-0.30	-0.35	-0.25
FCF	416.33	-85.15	835.29	331.49	1382.41	-296.05

Converting the Operating CAPEX/CFO into **percentages**, we see that the company has invested most of its amount in **operating assets in 2015.**
