Short-Term Borrowings

Non-Categorized Short-Term Liabilities

Short-Term Provisions

The value for short-term provisions is Rs.25 Cr for the year 2021, and for 2020, it is Rs. 21 Cr. Under financial liabilities, we find short-term borrowings which amounts for Rs. 144 Cr and Rs.201 Cr for FY2020 and FY2021 respectively. We will enter the same in our excel sheet.

Now that all line items are entered, the last one that remains is Current Tax Liabilities and Lease Liabilities. We can enter the same under non-categorized short-term liabilities.

That will cover our Current Liabilities as well as Total Liabilities and Equity Side.

31	**Non-operating items-**						
32	Short term Borrowings					144	202
33	Short term provisions					22	25
34	Non- categorized short term liablities					37	53

36	**Total Current Liabilities**	0	0	0	0	1613	2436

We now have numbers for Total Current Liability. We also know the total liabilities and equity that the company has. Unless we have made any normalization, the total liabilities at each level should match with the one that is reported.

We need to be careful that all the numbers have been included and also that no number has been included twice. Doing this, the liability side of the balance sheet is complete.

In exact same manner, we need to enter the numbers for previous years as well.

In the next unit, we will discuss the Asset side. We have already filled in the past data for the assets. Next, we will discuss the cash flow statements.
