

1. FIRM RESOURCES

A firm's resources could give it an advantage over other companies. Let us understand this through some examples:

COMPANY	KEY RESOURCE	WHY IS IT A COMPETITIVE ADVANTAGE?	EFFECT
Adani Ports	Controls 30% of India's ports	Other companies in the same sector cannot replicate this overnight and without significant investments	Monopolistic powers over certain segments
Saudi Aramco	Largest daily crude oil production	Its next closest competitor is almost five times smaller than Saudi Aramco	Control over pricing
Netflix and Disney+ Hotstar	Content Library	Building a comparable content library would require significant time and capital investments	Attracting subscribers
Jio	Network of telecommunication towers and fibre optic cables	Replication of such key infrastructure is a herculean task	High market share
