

CHAPTER- 1

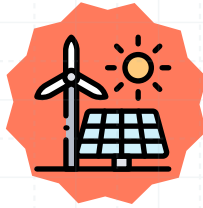

A company could have competitive advantages because of its value propositions, product decisions, and the customer segment served. Following are some examples of companies having a competitive advantage through their products:

Industry sheet is used to evaluate an industry's health in order to identify which sectors or spaces are worth investing in. It helps in identifying industries with strong market potential against those with less promising prospects. Selecting the right industry to invest in is half the battle.

REAL ESTATE

ENERGY

TECHNOLOGY

BUSINESS SHEET

Purpose: Identifying top performing companies in the industry.
