

BUY or NOT

Advantage of
a company / market
valuations

We need to balance the advantage of a company against its market valuations to decide on whether to buy or not.

APPROACH	DESCRIPTION
Invest in Established Winners	Invest in companies like HDFC Bank and Britannia, which have well-known competitive edges in their sectors.
	Potential downside: Higher share prices may already reflect their competitive advantages, limiting potential profits.
Identify Emerging Winners	Identify companies with potential competitive edges that are not well-known to the market yet.
	Potential upside: Lower share prices may not fully reflect the company's actual value, offering greater profit potential as the company grows.
