

CREATING A BUSINESS SHEET

Once we have identified an industry to invest in, our next step is to pick the right companies within that industry. Then we will have to create a business sheet for each company within the selected industry.

STEP 1

IDENTIFY THE INDUSTRY TO INVEST IN.

For example, if we choose to look at the cement industry after studying it, we gather information about all the cement companies.

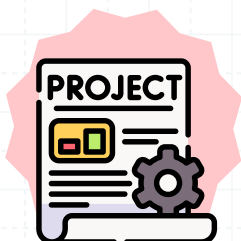

PICK THE RIGHT COMPANIES WITHIN THE INDUSTRY.

Then, we compare them to see what they're good at and where they need to improve. This helps us make informed decisions.

STEP 2

STEP 3

CREATE A BUSINESS SHEET FOR EACH COMPANY WITHIN THE INDUSTRY.

We create these business sheets to find out which companies are doing the best in the industry.
