

Also, naked options trading may only work when the market is bullish or bearish. However, options strategies can work when the market is bullish, bearish, range-bound, and volatile.

Let us see what kinds of strategies apply to each type of market.

Option Strategies		vs	Naked Options Trading	
Multiple CallPutPositions			Single CallPutPositions	
 Lenient monitoring of the trading account			 Tight stop-losses and active monitoring is required	
 Market Trends Works in diverse markets like bullish, bearish, range-bound, and volatile.			Only works with  	
More Flexible, Risk is hedged			Less Flexible, Risk is limitless
