

6.2.2 Securities Transaction Tax (STT)

When trading in futures, you must pay 0.02% STT of the price for which you traded the futures. Likewise, options attract an STT of 0.1% of the option premium. **STT is payable when you purchase or sell your futures or options.**

6.2.3 Cost of buying

When you purchase an option, you must pay the option premium, which depends on the underlying asset's price, time left for expiry, volatility, and interest rates. Additionally, you must pay fees to the exchange and your broker for facilitating this transaction.
