

Liechtenstein, (the other being Japan). Access to education and standards of living are high compared to the rest of the world. The second smallest of the world's continents, Europe contains 44 countries, including six

“microstates.” Most of Europe is **Christian**, and most European languages stem from Latin, German, or Slavic roots. Yet Europe is changing both ethnically and religiously due to **migration** from all corners of the globe.

European statistics

LANGUAGES

The relationship between most European languages can be traced; the exception is Euskara, which may predate the others.

Russian	170 million
German	98 million
English	63 million
French	60 million

RELIGIONS

The majority of Europeans are Christian. The influence of the religion on art, architecture, and culture can be seen everywhere.

Roman Catholic	185 million
E. Orthodox	105 million
Protestant	103 million
Muslim	20 million

URBAN POPULATION

Two of Europe's biggest cities are in Russia, its biggest country. None of these cities, though, is very large by world standards.

Moscow	8.4 million
London	7.4 million
St. Petersburg	4.6 million
Berlin	3.3 million

POPULATION BY COUNTRY

Europe's microstates have tiny populations. Only 25,000 live in San Marino, but Vatican City has far fewer residents—just 770!

Russian Fed.	145 million
Germany	82 million
France	59 million
United Kingdom	59 million

POPULATION

Europe's highest population density is in Monaco, the UK, and the Low Countries; its lowest is near the Arctic circle, where the climate is inhospitably cold, and in the vast Russian Federation, half of which belongs in Asia.
