

THE CONTINENTS OF NORTH AND CENTRAL AMERICA include 23

NORTH AND CENTRAL AMERICA

FROM THE ARCTIC TO THE TROPICS

countries plus
a number of
dependent
territories.

Deep chill

Recorded in 1971, the coldest-ever recorded temperature in Alaska is -80°F (-62°C).

Lots of latitude

Some parts of Greenland, Canada, and Alaska lie far inside the Arctic Circle, while the southern tip of Panama extends almost as far as the Equator.

Distant relation

The 50th state of the US, Hawaii, is far to the west of this map, halfway to Australia.

Under pressure

The huge ice sheet pushing down on Greenland has caused the island's center to sink to 1,000 ft (300 m) below sea level.

Coastal record

At 151,394 miles (243,638 km), Canada has the longest coastline of any country in the world.

Water power

Over 40 million gallons (180 million liters) of water rush over Niagara Falls every minute.
