

Changes of scene

Indigenous peoples and recent immigrants, old customs and modern trends, treasured handicrafts and modern technology, formal ceremonies and casual entertainments—all nourish the richly diverse cultures of North America. Each decade, new arrivals add their own color and detail to the constantly changing scene.

MOVING WITH THE TIMES

Today, the indigenous people of North America combine a wide range of elements from the modern world with their own customs and traditions. Here, a Canadian Inuit family navigates the forbidding conditions around their home on a high-speed snowmobile.

COMMON HERITAGE

Native Americans celebrate their shared history and tradition. Here, at the Red Earth Festival in Oklahoma City, two children display symbols of their diverse ancestry: between them, they have Kiowa, Cherokee, Comanche, Choctaw, and Navajo roots.

CULTURAL

North American cityscapes reflect the many influences that shape them. In Toronto, Canada's largest city, the City Hall and adjoining square sit between its bustling Chinatown and the glass towers of the business district. The dramatic complex was designed and built in the 1960s by the Finnish architect Viljo Revell.

PLAYING TO WIN

From major-league events, to college and high-school playoffs and casual street games, sporting activities play a major part in North American life. Baseball is more than a sport, though; it has become an international symbol of the United States. Across the country—even in the far-flung state of Hawaii—children don the uniform of their local Little League team to express their passion for their national game.
