

The Marathon

THE LARGEST RACE ON EARTH

THE VERY FIRST NEW YORK MARATHON was held on September 13, 1970. One hundred and twenty seven runners started, only 55 finished, and fewer than 100 people watched. By the year 2000, more than 32,000 people finished the race successfully, and it is now the world's largest marathon. The course is 26 miles (41 km) and covers all five of New York City's boroughs. People from all over the world take part, and the amounts raised for charity have a huge impact worldwide.
