

The great reef dive

SWIMMING AROUND THE WORLD'S LARGEST LIVING STRUCTURE

SCUBA DIVING IS ONE OF THE MOST POPULAR SPORTS in Australia. Thousands of tourists flock there each year to see the world's largest living structure, the Great Barrier Reef, which stretches down just off the east coast and covers an area about the size of New Mexico. There are 2,600 separate reefs, 1,500 varieties of fish, and 350 types of coral amid the crystal-clear waters. During the Sydney Olympic Games in 2000, the torch featured the first-ever underwater leg of its journey through the Great Barrier Reef.
