

Eudimorphodon

Plateosaurus

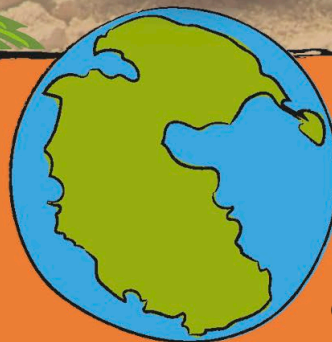

The first dinosaurs, pterosaurs, plesiosaurs, and mammals all appeared during the Triassic.

Many insects that lived during the Triassic are still here today.

New life

The first dinosaur fossils date back around 235 million years. They show us that early dinosaurs were a lot **smaller** than the giants that followed.

Pangaea

251 million years ago, Earth's land was all connected as **one big area** called Pangaea.
