

United Kingdom

Megalosaurus fossils found in Oxfordshire, England, inspired William Buckland to write the first scientific report about dinosaurs.

Archaeopteryx found in Germany

Germany

In 1860, Archaeopteryx was found in Germany. It turned out to be the missing link between dinosaurs and birds.

Protoceratops eggs found in Mongolia

Mongolia

Lots of fossils have been found in the Gobi Desert in Mongolia, including dinosaur eggs, nests, and a Velociraptor.

I proved
dinosaurs had
feathers.

Sinosauropteryx

China

In 1996, an important discovery was made in Liaoning, China. It was a Sinosauropteryx fossil that proved that some dinosaurs had feathers.

Egypt

Fossils from the late Cretaceous period are rarely found in Africa, but in 2018, a new sauropod was discovered in Egypt. It was named Mansourasaurus.

Antarctica

Dinosaur fossils have even been found on Antarctica. One example is Cryolophosaurus, a theropod from the early Jurassic.
