

Palaeontologist tool kit

Digging up dinosaur bones is **slow, careful work**, so palaeontologists need a special selection of tools to help them uncover the delicate fossils.

Tools of the trade

Palaeontologists use very expensive high-tech equipment, but they also use **everyday objects** like cutlery and paintbrushes. Each dig needs special tools depending on the size of the site and how fragile the fossils are.

Camera

It's important to document the dig with lots of photos.

Walkie-talkies

These radios are perfect for keeping in touch with other members of the team.

Tooth picks

Wooden picks are great to clean out tiny, delicate things.

Selection of brushes

Brushes can gently sweep away dust.

Toothbrushes are perfect for cleaning fossils.
