

Pen

Tape measure

All the different parts of a fossil need to be measured.

Small bags

Small finds are placed in bags and labelled.

A special solution helps stick pieces of a fossil together if they have cracked.

Solution

Hand pick

Hand picks can remove rough stone from around a fossil.

Chisel and hammer

A chisel and hammer can chip away at hard mud.

Spoons

Spoons are used to carefully dig around fossils.

Trowel

Trowels make fast and precise digging tools.

Line pins

Pins and string are used to mark the dig area.

Ruler and pencil

Scientists need to take careful notes and make drawings of the site as they dig.

Notebook

String
