

Thyreophorans (THIGH-ree-OFF-oh-rans)

These plant-eaters walked on four legs and had protective spikes and armoured plates.

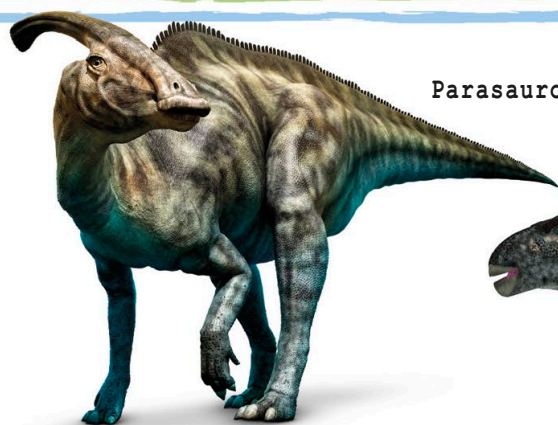

Stegosaurus

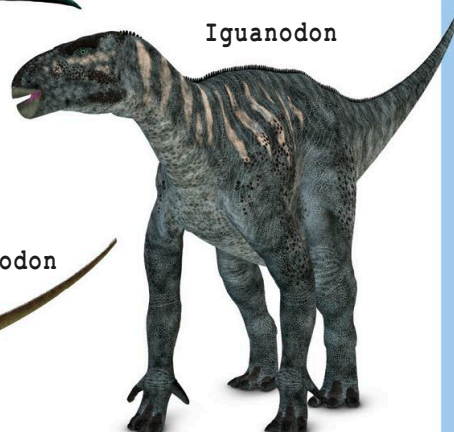

Ankylosaurus

Edmontonia

Parasaurolophus

Iguanodon

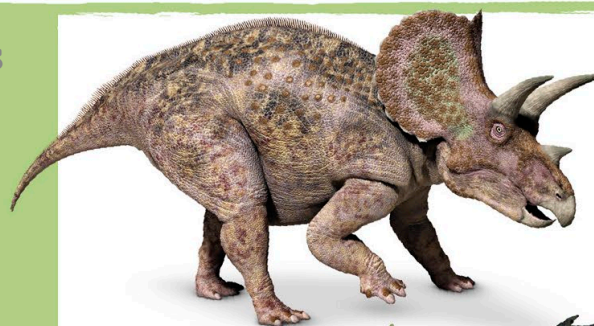

Hypsilophodon

Ornithopods (OR-nith-oh-pods)

A common group of dinosaurs, ornithopods were browsers who walked on two legs and sometimes travelled in groups.

Marginocephalians (MAR-jee-no-sa-FAY-lee-ans)

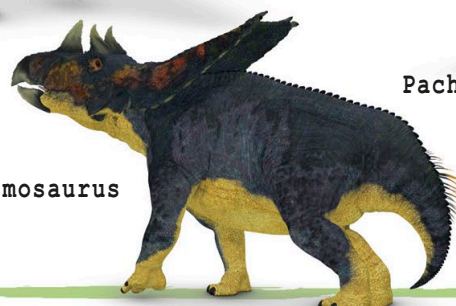

Common in the Cretaceous period, these dinosaurs had bony frills on their heads. Some walked on two legs, others walked on four.

Triceratops

Pachycephalosaurus

Chasmosaurus
