

They aren't dinosaurs!

The creatures that dominated the prehistoric **skies** and **seas** might have looked like dinosaurs, but they were totally different animals.

Pterodactylus

We ate plenty of fish, but we also scavenged for a lot of our meals.

Rhamphorhynchus

Ornithocheirus

Pterosaurs

These winged wonders were prehistoric **flying reptiles**. They had light bodies, and their wings were made of stretched skin that was attached to their bones.
