

Heterodontosaurus

HET-er-oh-DON-toe-SORE-us

This speedy little dinosaur was only about the size of a turkey. Its **unusual teeth** set it apart from most other dinosaurs.

Most dinosaurs only had one type of tooth, but we had several.

What a mouthful

Heterodontosaurus' mouths had small teeth in the front, sharp teeth on the sides, and a beak. It could choose the **best way** to eat depending on its food. It also had long fangs.

Five curved fingers
