

Our long fangs
were probably used
for **FIGHTING** instead
of **EATING**.

Small but fast

Strong **hind legs** helped
Heterodontosaurus quickly
run away from attackers.

Heterodontosaurus means "different-toothed lizard".

This Heterodontosaurus
fossil from South Africa
is one of the most complete
fossils ever found.

Size: 1m (3ft) long

Habitat: Scrubland

Diet: Plants and insects
