

Prime predator

Allosaurus hunted herbivores, including Stegosaurus. It usually hunted alone but may have hunted in packs. However, bite marks on fossils show that working together didn't always go well – Allosaurus often ended up attacking **each other**!

Allosaurus means
"DIFFERENT LIZARD".

Terrible teeth

Allosaurus' most dangerous weapon was its **teeth**. It grew new teeth throughout its life so they were always sharp. Allosaurus could open its jaws very wide to take huge bites.

Long tail helped
with balance

Size: 12m (39ft) long

Habitat: Woodlands

Diet: Meat
