

LILY: EIGHT-POINT STAR

1 Cut six 45-degree angle diamonds for the “petals” from fabric A, two petals from fabric B, and four corner squares and eight right-angled triangles from fabric C (see p.37). Make sure to cut half of the petals in reverse, to form pairs. From fabric D, cut a strip 2.5cm (1in) wide and long enough to fit across the diagonal of one fabric C square for the “stem”.

2 Matching the prints, join the “petals” in pairs as shown above. Apply the fabric D strip diagonally across one of the fabric C squares. Turn the raw edges under on the long edges and level both short ends even with the corners of the square (see Maple leaf, p.103). Topstitch 2mm ($\frac{1}{16}$ in) from the folded edge to square C.

3 Stitch a right-angled triangle to both long sides of each pair of “petals”.

4 Set in the corner squares (see pp.74–75) to make four units. Make sure you catch the raw edges of the “stem” square in the seams.

5 Stitch together the units in pairs, then stitch together the pairs, manipulating the seams in the centre to help them lie flat.
