

CAKE STAND BASKET: FIVE-PATCH

...Cut eight from fabric A

...Make eight from fabrics A and B

1 Divide the size of the finished block by five. Add seam allowances. Cut eight squares this size from fabric A. Make eight half-square triangles (see p.64) from fabrics A and B.

2 The finished centre half-square triangle is three times the size of the outside squares. Cut one triangle from fabric A and one from fabric B to this size and stitch them together on the diagonal.

...Stitch together three half-square triangles

...Stitch together two plain squares and one half-square triangle

3 Stitch together three small half-square triangles, then stitch one small half-square triangle to two small plain squares. Sew the strips to opposite sides, top and bottom, of the centre half-square triangle.

4 Following the layout above, stitch the remaining small squares into two strips and sew the strips to opposite, left and right, sides of the large unit. Match all of the seams carefully.
