

SHIP: DOUBLE FOUR-PATCH

1 The fabric requirements given here make a 30.5cm (12in) square block. Divide the size of the finished block by four ($7.6\text{cm} / 3\text{in}$). Add seam allowances to each side ($8.8\text{cm} / 3\frac{1}{2}\text{in}$). Cut 10 squares this size from fabric A, four from fabric B, and four from fabric C. Set aside four from fabric A and two from fabric B to use as squares. The others will be made into half-square triangles. Divide the finished mini block by three ($7.6\text{cm} \div 3 [3\text{in} \div 3]$) and add 1.2cm ($\frac{1}{2}\text{in}$) seam allowance to determine the size of the strips that make up the "sea" ($8.8 \times 3.7\text{cm} [3\frac{1}{2} \times 1\frac{1}{2}\text{in}]$). Cut four strips in each of three "sea" colours to that measurement.

2 Stitch together the $8.8 \times 3.7\text{cm}$ ($3\frac{1}{2} \times 1\frac{1}{2}\text{in}$) sea strips to make four units the same size as the plain squares 8.8cm ($3\frac{1}{2}\text{in}$). You can also make the "sea" from three long strips if you prefer. The length of each strip would be the same as the finished measurement of the block ($30.5\text{cm}/12\text{in}$) and the width should be the width determined in Step 1 ($3.7\text{cm}/1\frac{1}{2}\text{in}$).

3 Following the layout, stitch the half-square triangle units together by drawing a diagonal line from corner to corner and stitching along that line. Piece together the rows using a 6mm ($\frac{1}{4}\text{in}$) seam allowance.

4 Stitch the four rows together, aligning the points to complete the block.
