

▶▶ USING APPLIQUÉ TEMPLATES

There are many ways to make appliqué templates (see p.28), but the principle is the same for most. If you will be using the same shape over and over, it is best to use stiff card or template plastic. If you will only be using

it once, use paper or tracing paper. Templates can be created for almost any shape. You can trace a pre-existing shape, or create your own hand-drawn shapes.

1 With a marker pen or pencil, draw or trace your shape onto the template material of your choice.

2 Using a sharp pair of scissors, not your fabric scissors, carefully cut out the shape.

3 Position the template on the fabric and trace around it with a water-soluble pen. We've used a pencil here so the lines can be easily seen.

4 Take care in positioning the template on the fabric to avoid any unwanted part of the fabric pattern on your appliqué piece.

5 Add a 3–6mm ($\frac{1}{8}$ – $\frac{1}{4}$ in) seam allowance to the outside of the traced line.

6 Using a sharp pair of fabric scissors, cut out your design along the seam allowance line.
