

► FREEZER PAPER APPLIQUÉ

Freezer paper is a stiff, white paper coated on one side with a film that can be ironed onto fabric and easily removed without leaving residue. The paper side is ideal for drawing patterns onto. It can be found in quilt

shops, at some supermarkets, and online. Seam allowances can be pressed over the edge to the wrong side to give a hard crease that makes it easy to sew the shapes in place.

1 Trace the templates in reverse on the non-shiny side of the freezer paper and cut out.

2 Place the freezer paper template on the wrong side of the appliqué fabric, shiny side down and trace around it.

3 Add a 3–6mm ($\frac{1}{8}$ – $\frac{1}{4}$ in) seam allowance all around, then iron the template in place. Cut around the shape on the marked seam allowance.

4 Clip or notch any peaks, valleys, or curves up to the paper (see p.111). Press the seam allowance to the wrong side, using the edge of the freezer paper as a guide. Remove the freezer paper and blind stitch the shape to the background fabric.

► RAW-EDGE APPLIQUÉ

Non-woven fabrics, such as felt and felted wool, that won't fray can be used effectively in decorative

appliqué, but remember that they cannot be laundered. No seam allowances are needed.

1 Trace your entire pattern onto the background fabric. Then trace the pattern pieces separately on tracing paper. Cut out each paper pattern and pin to the fabrics.

2 Cut out the appliqué pieces (without a seam allowance). Pin the first piece to the background and stitch in place, using a decorative stitch.

3 Add pieces in order. Remove all the pins and press from the wrong side.
