

7 With right sides together and the sashings vertical, pin the left-hand raw edge of the aqua square to one of the vertical sashings attached to the blue square. Stitch, leaving a 1 cm ($\frac{3}{8}$ in) seam allowance. Press towards the aqua square. Repeat Steps 5–7 to join the other blue and aqua squares in the same way, to make two patchwork rectangles.

8 To make the horizontal sashings, lay three of the remaining 18 half-square triangles in a horizontal row with the aqua triangles along the top edge. With right sides together, stitch the half-square triangles together, leaving a 1 cm ($\frac{3}{8}$ in) seam allowance. Press the seams towards the darker triangles. Repeat to make a total of six horizontal sashings.

9 Place the small pale green triangles on top of the small jade green triangles with the points of the triangles top right, as shown. Chain piece the triangles together along the right-hand edges, leaving a 1 cm ($\frac{3}{8}$ in) seam allowance. Snip the triangles apart. Press the seams towards the jade green triangles.
