

10 With wrong sides together, pin the triangles together in pairs, matching the seams. Chain piece them together as in Step 9. Snip them apart, then open them to form nine small quarter-square triangles. Press the seams open.

11 Lay a horizontal sashing so that its aqua triangles are along the top edge. With right sides together, pin a quarter-square triangle to each end of the sashing, so the small pale green triangles adjoin the sashing. Stitch, leaving a 1 cm ($\frac{3}{8}$ in) seam allowance. Press the seams towards the quarter-square triangles.

12 Lay another horizontal sashing so that its aqua triangles are along the bottom edge. With right sides together, pin it to the right-hand edge (a small pale green triangle) of the quarter-square triangle that was attached in Step 11. Stitch, leaving a 1 cm ($\frac{3}{8}$ in)

seam allowance. Press the seams towards the quarter-square triangles. Repeat steps 11–12 to complete another horizontal sashing. You now have the first and third sashings.
