

4 Lay the coaster top on the backing fabric. Using the quilter's ruler and the rotary cutter, cut a piece of the backing fabric to match.

5 With right sides together, lay the coaster top on the backing fabric. Align the edges and pin all around.

6 Sew around the edges, leaving an opening of approximately 5cm (2in) along one edge for turning through.

7 Clip into each corner, taking care not to cut through the stitches.

8 Turn the coaster to the right side through the opening and pick out the corners with a pin. Iron thoroughly. If you would like a more padded and absorbent coaster, cut a piece of wadding smaller than the coaster and insert it through the opening. Press the wadding flat.
