

ELECTRONIC DEVICE COVER

You can make this project to fit any electronic device, whether it's a laptop, tablet, or even a phone. Just remember to adjust all of the fabric

requirements and flower template size, as needed. You can use a paper clip to hold the template and fabric pieces together.

DIFFICULTY LEVEL

Medium

SIZE

To fit the device of your choice

TOOLS AND MATERIALS

Card

Paper clip (optional)

Pins

Needle

Threads to match the fabrics

Quilter's ruler

Cutting mat

Rotary cutter

Tailor's chalk or water-soluble pen

Scissors

Velcro® for the closure. You will need enough to fit across the width of your device

FABRICS

12 x 18cm (5 x 7in) petal fabric

6 x 6cm (2½ x 2½in) flower centre fabric

Calculate the main fabric requirements for your device by following the instructions in Step 4

You will need enough wadding to fit around the circumference of your device, plus 15.5cm (6in) extra in both dimensions

Bias tape to fit the edges of your device
([length + height of device] x 2)

SKILLS

English paper piecing (see pp.88–89)

SEAM ALLOWANCE

6mm (¼in), unless otherwise stated

PATTERN

1 Copy and cut out seven paper hexagons using the template on page 214. Using the English paper piecing technique (see p.88) create six hexagons in the petal fabric and one hexagon from the flower centre fabric.

2 Join the hexagons into a flower shape, oversewing the petals to the centre hexagon, then the sides of the petals to one another (see p.88).

3 Once the petals are joined, press the finished flower to set the folds. Set aside.
