

8 Turn the small square of fabric through the hole, to the wrong side of the main front fabric. The wrong side of the square will sit wrong side to the bag front leaving a finished turned-edge seam.

9 Ensure that the shape of the hole forms the same shape as your paper template. Press the seam flat on both sides.

10 Centre the motif under the hole with both fabrics right side up. Pin around the edges leaving enough room to topstitch.

11 Thread your machine with a thread to match your main fabric, then topstitch around the edge of the hole approximately 3mm ($\frac{1}{8}$ in) from the edge using a straight stitch, or a decorative stitch, if you choose to. Remove the pins as you work.

12 Turn the bag front over, then trim the excess fabric from around the motif and the turned-through square to 6mm ($\frac{1}{4}$ in). Be careful not to cut the main fabric of the bag front.
