

3 To cut the strip into smaller units, position it horizontally on the mat and measure using the ruler grid. Cut as before.

CUTTING SQUARES AND RECTANGLES

Squares and rectangles can also be cut using a quilter's ruler, which has a guideline marked across the diagonal from corner to corner. Add a 2.2cm ($\frac{7}{8}$ in) seam allowance when cutting a right-angled triangle and a 2.75cm ($1\frac{3}{4}$ in) seam allowance when cutting a quarter-square triangle.

CUTTING A PIECED STRIP INTO SMALLER STRIPS

Press your pieced strip and position it right side up horizontally on the mat. If necessary, straighten the pieced strip at one end, as in Step 1 of Cutting a strip (see opposite). Turn the strip and reposition the ruler over the area that you want to use. Cut pieced strips of the desired width.
