

CUTTING A PIECED STRIP ON THE BIAS

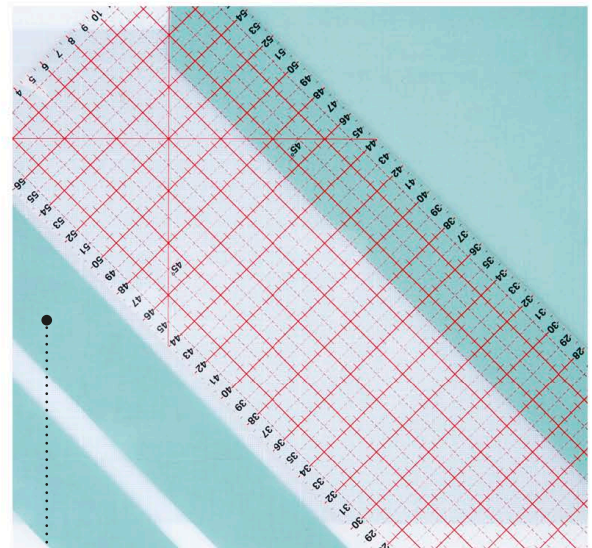

Trim one end of the pieced strip at a 45-degree angle, using the line marked on the quilter's ruler. Cut strips of the desired width at the same angle by measuring along the straight edge of the ruler.

CUTTING TRUE BIAS STRIPS

1 Straighten the edge of the fabric as in Step 1 of Cutting a strip (see p.34). Align the 45-degree mark on the ruler with the straightened edge and cut away the top corner of the fabric along the ruler.

2 Align the ruler with the cut edge and cut strips of the desired width, as in Cutting a pieced strip on the bias, above. Be careful when using bias strips as the 45-degree cut brings stretch to the fabric.
