

▶ STAR BLOCKS

There are probably more kinds of star blocks than any other patchwork motif; the construction ranges from simple four-patch stars to extremely complex designs created by cutting 60-degree diamonds in half

lengthways or crossways. The basic eight-point star alone, with its 45-degree angles, is the starting point for numerous variations, including the intricate lone star.

TIPS FOR MAKING BLOCKS

- **When marking**, make sure the marker has a sharp point. If you mark with dashes, not a continuous line, the fabric is less apt to shift or stretch.
- **Remember the rule:** measure twice, cut once. And bear in mind that measurements from one brand of ruler or mat are not always exactly the same as another brand. For accuracy, try to use the same ruler and mat, as well as the same machine foot, throughout the piecing process.
- **If you make** a sample block to begin, you can measure your finished blocks against it to ensure accuracy.
- **Whenever possible**, sew a bias edge to a straight edge to minimize stretching.
- **If you need** to trim a block to make it smaller, trim back an equal amount from all sides to keep the design of the block accurate and centred.
