

▶ TRIANGLE CORNERS

Triangle corners are made the same way as Flying geese (see p.67), but four corners are added around a square instead of two to a rectangle. This can be

a good method of adding a border around a completed block, to tilt it on its point.

- 1 Cut one large square from a fabric to the required size. Cut four squares, each half the size of the larger square, plus 6mm ($\frac{1}{4}$ in) extra, from another fabric. Here we have used a 9cm ($3\frac{1}{2}$ in) large square and four 5.1cm (2in) small squares.

- 2 Draw diagonal lines on the wrong side of the smaller squares, as shown.

- 3 Place and pin the smaller square on the upper left corner of the larger square with the diagonal line as shown.

- 4 Carefully stitch through the diagonal line of the smaller square.

- 5 Using a rotary cutter and quilter's ruler, trim off the excess fabric, leaving a 6mm ($\frac{1}{4}$ in) seam allowance.

- 6 Unfold the smaller square and press into position.

- 7 Repeat the process on the remaining three corners, working clockwise.

- 8 With the right side facing up, press flat.
