

MAKING A STRAIGHT BORDER WITH SETTING SQUARES

1 Follow Step 1 of Making straight borders (see p.81) to add a border to the piece on either side. Press the seams towards the borders.

2 Cut two strips the same length as the top and bottom edges of the quilt without the borders, plus a 1.2cm (1/2in) seam allowance.

3 Cut four setting squares with sides the width of the borders. With right sides together, sew a square to each end of the strips. Press the seams towards the centre.

4 With right sides together, sew the pieced strips to the top and bottom edges of the quilt. Press the seams towards the border.

5 The quilt top is now completed and ready to be quilted (see pp.130–133, 134–137).
