

We look at different financial statements like the Balance Sheet, the Profit and Loss Statement, the Changes in Equity, the Cash Flow Statement, and notes to different accounts.

Experienced analysts can understand the health of different companies by looking at the above statements. This helps them make decisions about investments, lending, general corporate finance etc., by analyzing the company's data.

The above statements together are known as the Financial Statements. Each line item will be analyzed so that the strengths and weaknesses of any given company can be understood.

This book aims to understand financial health for any given company. This is critical for all sorts of financial activity like banking, investments, etc.
