

Productive fixed assets =

$$\text{Rs. 130 Cr} + \text{Rs. 433 Cr} + \text{Rs. 637 Cr} = \text{Rs. 1200 crores}$$

Unproductive fixed assets =

$$\text{Rs.7 Cr} + \text{Rs. 33 Cr} + \text{Rs. 45 Cr} = \text{Rs. 85 crores}$$

So, the sum of these gives the total gross block, which stands at 2481 Cr.

Similarly, for 2020, we find,

Productive fixed assets =

$$\text{Rs. 123 Cr} + \text{Rs. 382 Cr} + \text{Rs. 552 Cr} = \text{Rs. 1057 crores}$$

Unproductive fixed assets =

$$\text{Rs. 7 Cr} + \text{Rs. 35 Cr} + \text{Rs. 43 Cr} = \text{Rs. 85 crores}$$

$$\text{Gross Block for 2021} = \text{Rs. 2483 crores}$$

$$\text{Gross Block for 2020} = \text{Rs. 2236 crores}$$

29	One time recoverables (Short term loans and advances)					138	150
30							
31	Fixed Assets - Productive					1057	1200
32	Fixed Assets - Unproductive					85	85
33	Gross block					2236	2483
34							

This is how we can add the entire fixed assets to the input sheet. For proper practice, you need to input all the data for the previous years for different types of companies. This way we will get more comfortable with different types of assets that come up in different industries.

In the next unit, we shall continue with “Intangible assets”.
