

Revenue from operations will be auto calculated from the Annual Input Section.

Operating Expenses

Let's begin with Cost of goods sold. It is the sum total of the:

$$\text{Cost of materials consumed} + \text{Purchase of stock in trade} + \text{Changes in inventories of finished good}$$

EXPENSES			
Cost of Materials Consumed	35	3,017.82	2,997.71
Purchases of Stock-in-Trade		477.17	383.57
Changes in inventories of Finished Goods, Work-in-Progress and Stock-in-Trade	36	(118.32)	21.22
Employee Benefits Expense	37	980.86	927.22
Finance Costs	38	37.23	33.60
Depreciation, Amortisation and Impairment Expense	39	200.66	169.92
Other Expenses	40	1,254.56	1,388.73
Total Expenses		5,849.98	5,921.97

Thus,

$$\text{Cost of goods sold in 2021} = \text{Rs. 3018 Cr} + \text{Rs. 477 Cr} - \text{Rs. 118 Cr} = \text{Rs. 3377 Cr}$$

$$\text{Cost of goods sold in 2020} = \text{Rs. 2998 Cr} + \text{Rs. 384 Cr} + \text{Rs. 21 Cr} = \text{Rs. 3403 Cr}$$

We will do this for each financial year in the excel sheet.

Employee Benefit Expenses will be auto-calculated from the Annual Inputs section. We can see that it is Rs. 980 crores for FY21 and Rs. 927 crores for FY20. We need to have this for each year.

We now fill up Depreciation and Amortisation, which stands at Rs. 201 Cr for 2021 and Rs. 170 Cr for 2020.

10	Operating Expenses -								
11	Cost of goods sold							3403	3377
14	Employee Benefit Expense	0	0	0	0			927	980
15	Depreciation and Ammortisation							170	201
