

Next, we need to find the total value of smaller expenses combined i.e. Other Operating Expenses. To do this, we will subtract the sum of major other expenses from the total other expenses. That comes out to be Rs. 668 crores for FY21 and Rs. 732 crores for FY20.

The total 'other' operating costs stands at Rs. 5813 Cr for 2021 and Rs. 5889 Cr for 2020.

16	Other operating expenses:						
17	Clearing, forwarding and octroi duty				297	331	
18	Advertisement and Publicity				285	160	
19	Contract labour				75	96	
21	Other Operating Expense				732	668	
22	Total operating expenses	0	0	0	0	5889	5813
32	Non-operating expenses-						
33	Finance Costs				34	37	
34	Other non-operating						
35	#1						

The finance costs are Rs. 37 Cr for 2021 and Rs. 34 Cr for 2020. These will be entered into other non-operating costs.

EBITDA & EBIT

To arrive at the Earnings Before Interest and Taxes (EBIT), we can subtract the Total Operating Expenses from the Revenue from Operations. From the example, it can be seen that EBIT stands at Rs. 1480 crore for 2021 and Rs. 1405 crore for 2020. We can also calculate the EBITDA from the Income Statement by adding Depreciation and Amortization to EBIT. EBITDA stands at Rs. 1681 crore for 2021 and Rs. 1575 crore for 2020. We can see that these cells are automatically calculated in our Income Statement.

16	Other operating expenses:
