

26	Non - operating Revenue:						
27	Interest				12	17	
28	Dividend				12	1	
29	Other non operating Income				125	62	
30	Total Non- operating revenue	0	0	0	0	149	79

To arrive at the Total Non-operating revenue, we need to add up all the respective non-operating revenues. As seen from the example, Total Non-operating revenue stands at 79 Cr for 2021 and 149 Cr for 2020.

We see that we have divided the Income Statement as a whole into two segments - Operating and Financial. Going ahead we will do the same with Balance Sheet as well. This will come in really handy while analyzing numbers ahead.

Make sure that you check if you have not missed out on anything before moving ahead. Once you are assured that nothing is missing, we arrive at Profit Before Tax (PBT).

For FY21 and FY20 respectively. We have re-arranged line items in our income statement as per the excel sheet but the net outcome at the end must be same. The Total Comprehensive Income or the Total OCI should remain the same. We must ensure that we are only re-categorizing items and we have not omitted anything unless it is a one-time or non-recurring item.

So far we have entered the highlighted numbers in our income statement. Lets move forward and complete the remaining items one by one.
