

We should include items like cash and cash equivalents, bank balances, fixed deposits with maturity less than 3 months etc. in Surplus cash itself.

Now, we will be filling out current tax assets. The values stand at Rs. 3 Cr for the current year and Rs. 2 Cr for the previous one.

c) Loans and Advances

The only thing that is left is the value of loans. We get the short term loans and advances from the Annual Inputs where we had broken them down as Reverse Float like items and One Time Recoverable. We can even enter the same manually.

25	Bad Debts Written Off					4	7
26	Provision for Bad debt					78	89
27							
28	Reverse Float like items (Short term loans and advances)					148	148
29	One time recoverables (Short term loans and advances)					138	150
30							
31	Fixed Assets - Productive					1057	1200
32	Fixed Assets - Unproductive					85	85

58	Non-operating Assets						
59	Surplus Cash & cash equivalents					703	452
60	Short term loans and advances	0	0	0	0	286	298
61	Loans					17	17
62	Asset held for sale						
63	Current tax asset						

2	Current Assets						
(a)	Inventories	17				1,234.15	929.47
(b)	Financial Assets						
(i)	Investments	9				176.46	719.73
(ii)	Trade Receivables	10				1,321.02	1,088.50
(iii)	Cash and Cash Equivalents	15				442.65	692.23
(iv)	Bank balances other than (iii) above	16				8.81	11.02
(v)	Loans	12				16.89	17.38
(vi)	Other Financial Assets	14				85.26	103.18
(c)	Current Tax Assets (net)	19				3.13	1.93

If you recall, when entering numbers for reverse float-like items and one-time recoverables, we examined other financial assets and other current assets. As a result, the line item "Loans" was not included in short-term loans and advances. Therefore, we can add it separately under the "Loans" category in our Excel sheet.

With this, we have entered all the values for Balance Sheet. Do not worry if you get confused. As we move ahead, you will start gaining more confidence about the numbers. Do not stress a lot if your numbers do not match too. You will figure out if there are mistakes going ahead.

For now, we have completed the Balance Sheet. We need to ensure that the Assets side and Liabilities side matches in value.
