

Whenever it's 110 percent or 121 percent in the negative, the company has likely taken money from the financing activities in the form of debt or equity.

Interest Paid	-13	-14	-16	-17	-25	-29
Sharecapital issued to Minority	34	81	24	29	3	-29
Lease Liabilities	0	0	0	0	-34	-34
CFF	-371	41	-790	-361	-849	-76

It can be seen that they have taken proceeds from share capital. They have not received money directly and invested more than generated in cash flow from operations. So, **possibly they have used up their cash reserves**. We will look at this when we look at Cash flow from Financing Activities.

Let us go to Cash and cash reserves in the Balance Sheet.

Current Assets						
Accounts Receivables	702	769	938	1056	1089	1321
Inventory	628	721	804	935	929	1234
Operating Cash Requirement	0	0	0	0		0
Other operating assets	11	15	12	13	14	14
Non-operating Assets						
Surplus Cash & cash equivalents	132	100	164	190	703	452
Short term loans and advances	98	127	228	223	286	298
Loans	12	13	12	12	17	17
Asset held for sale	0	0	6	0	0	0
Current tax asset	0	0	29	3	2	3
Current Investments	569	1390	1115	1151	720	176
Total Current Assets	2152	3135	3307	3584	3760	3515

It is seen that the company had a lot of cash in 2020, which went down significantly in 2021.

Thus, we can conclude that the **company used cash in investing activities**. This is how you know how a company uses its cash flow.

Cash in 2020

Cash in 2021
