We can cross check our understanding and analysis of Cash Flow from Investing Activities with the numbers in Balance Sheet. We can see the years when Operating Assets are increasing and the years where Financial Assets are increasing. We also need to check which assets are increasing.

Non-operating Assets						
Surplus Cash & cash equivalents	132	100	164	190	703	452
Short term loans and advances	98	127	228	223	286	298
Loans	12	13	12	12	17	17
Asset held for sale	0	0	6	0	0	0
Current tax asset	0	0	29	3	2	3
Current Investments	569	1390	1115	1151	720	176
Total Current Assets	2152	3135	3307	3584	3760	3515

In 2020 the cash was very high i.e. 517 Cr in hand. Other current non-operating assets have also increased, which are financing in nature. So, the company's financing assets have also been increasing significantly, which means the company is using a lot of cash generated in the business for investments. While a part is going to the operating assets, major chunk is going to the investing activities.
