

These numbers usually vary from one company to another. They are small for some companies and high for others. If these numbers are significant, we need to analyze them in detail.

As for FY 2021, we see that Non-interest bearing debt-like items stand at 6.30% as a percentage of revenue. We can see that this is a significant number. We need to understand what is included in this and what is the reason for sharp increasing in these liabilities. We will look into how the company plans to repay the same.
