Evaluate segmental utilization of fixed assets

This can be found in the Annual Inputs Statement, where the revenue, EBIT, and assets were entered for different segments.

Taking a look at different assets, we can see which segments use the highest assets and how those numbers are changing over time.

Major Business Segments - Assets						
Consumer and Bazaar	2118	2521	3011	2608	3069	6353
B2B	388	435	508	1173	1383	1566
Others	39	42	46	79	76	21
0						

As seen, the highest asset utilization is by Consumer and bazaar products. This needs to be compared with the EBIT generated by the company.

Growth in assets related to Industrial Products have been relatively stable except for 2020, where a big jump was seen, which can be further checked in Non-current assets. Moreover, segmental analysis is important for a thorough understanding of different business segments.

We will learn more about segmental analysis in greater detail in further chapters of the book.
